Trousers

Always Feminine
in pants

Basic of the women's wardrobe, the pants are chosen according to their morphology to be comfortable and put its forms in value. But in linen or jeans, right or bootcut, there are various models! Which one should we choose to be canon? Cut, material, color, height of legs and type of size ... Learn all you need to choose the right trousers

We have all been in a clothing store, unable to find the pants that would make us safe, without having to try a dozen to see the entire shelf! Worse, sometimes we can not find it: it was too tight, this one, too big and the last of the stock we even fattened the buttocks ...

The pants is the garment that highlights the most areas of the bodies most prone to complexes and the most delicate to highlight, namely the thighs and buttocks. Logic that we spend hours in store trying to find the one that would make us hot! But not all shapes are for all of us ... It's important to know which cuts or materials are best matched to our silhouette, to avoid odd ones.

Natural ! Long Hair

Brushing is life! As obvious as it may seem, brushing contributes to the good health of the hair. We lose an average of a hundred hair a day, which does not mean that you run baldness. Remember to brush each evening, it eliminates all the dead cells accumulated during the day while aerating your hair. Down with polluting shampoos. The choice is vast today, the products of big surfaces promising mounts and wonders. Only silicone is everywhere, smothering the scalp. Prefer instead shampoos without excessive addition of chemicals

TRIP

BURMA : FAIRY

Burma has long been cut off from the world and is now one of the most coveted destinations of the moment. The reason ? Its multitude of enchanting sites, each one more beautiful than the others, which make it a captivating country: the Shwedagon pagoda of Yangon, the magnificent region of Hpa-An, the beaches lined with coconut trees ... So many reasons to go make a tour.

NORWAY : VEGA ISLAND

With its green cities, designer boutiques, ultra-inventive Nordic cuisine, rich art galleries ... Norway introduces the joys of the Scandinavian art of living. Especially when heading for Vega, a wild archipelago off the Norwegian coast. The island can be reached by car, by boat or by bike, discovering its dense forests, wind-blown beaches and small houses of fishermen with red walls.
