BARBIE OF THE MONTH

This pretty blonde of 1m80, with green eyes lives in Luxembourg. She scrolls on the catwalks in a Versace dress (photo opposite). She has a very authoritarian character and she is very determined. She failed to qualify for the finals of Barbie's most beautiful face, but maybe in the next contest ...

HATS

Do you have the head for ?

Head to hat or no head to hat, that is the question. We often think that we have it, or we do not, but in fact it's a little more complicated than that. If oval faces have the chance to afford almost anything in terms of shape, sometimes it's complicated to find the right model.

And since it's time to put on your felt cape or mesh cap, here are some purely morphological tips that may help if you're skeptical about wearing a headgear.

Dare the color ! Colored Hair

For some seasons, social networks have been full of photos of young women with flashy or multicolored hair. Good or bad idea ? We have therefore decrypted this phenomenon.

Flashy hair and fluo. To respect the trend, the hair is colored in an original hue (blue, green, pink ...). The coloring can be united or partial, by producing wicks or a scan. If you want to adopt this kind of technique, bet more on a color that is close to your base.
