TRAVEL

Canada

Landscapes in Canada vary and change colors with the seasons. In winter, the beauty of snowy mountains will make you forget the temperatures. Discover the local traditions like ice fishing, for example. This ice fishing activity will allow you to meet the locals who will tell you about their traditions and customs. An enriching discovery, especially during a family trip: the children will be fascinated for sure. They will also enjoy a dog sledding in the heart of the forests: thrills guaranteed ! If you want to find out the many Canadian national parks, opt for a roadtrip in a motorhome. the national park Jasper, for example, in the heart of the snow-capped peaks of the Canadian Rockies, is a wonderful field of exploration where you will come across hot springs, waterfalls and large glaciers.
